Q: Hash sum of downloaded tar.gz files in bash I have a directory of tar.gz files. I would like to download them one by one and check the hash sums to see if they match. How would I do that with bash? I'm currently using: wget -N -c --content-disposition I want to only download the first tar.gz file and then check the hash sum with the following: md5sum file.tar.gz A: You can use a for loop to iterate over the files. for file in /path/to/archive/*.tar.gz; do wget -c --content-disposition "\$file" md5sum "\$file" done =.01). Discussion {#section5-2325967120915857} ===== The purpose of this study was to determine whether osteophyte size and BMLs affect the risk of sustaining a recurrent MTSS. In this series of patients with 3 or more MTSSs, an increased number of osteophytes at the time of the first MTSS were associated with the development of a subsequent recurrent MTSS. In addition, a greater size of osteophytes at the time of the first MTSS was associated with the development of a subsequent recurrent MTSS. In one study of medial tibial plateau bone contour in knee OA, Bland et al¹ [PUBMED:2325967120915857] noted that larger osteophytes
